

OUR COMPANY

Insight Property Services provides home performance testing, home inspections, and home performance training in the Chicagoland area. We provide high value services for contractors, home owners, and investors.

Insight uses the principles of Building Science and “Home as a System” to provide home and property owners and contractors with the comprehensive knowledge needed to reduce home energy needs, increase comfort, maintain structural integrity and operations, and analyze utility costs.

Insight’s training courses prepare contractors and other employees to cost effectively meet new building code requirements, to improve the performance of existing homes safely, and to earn certifications required by state and utility sponsored incentive programs.

Air Sealing and Insulating Professional

Expand your skill set. Trace problems to their root causes, prescribe real solutions, and get the job done right – the first time. BPI certified home performance installers are in high demand. Learn to tighten the building envelope to reduce energy loss as well as improve thermal comfort and energy efficiency.

In this course, you will learn:

- Hands-on training
- Installation skills
- Safety considerations
- Identify opportunities
- Why air sealing is important
- how to use the proper materials
- the right techniques to completing air sealing
